Message from the President

Congratulations to members of the graduating class of 2010 on earning your degrees from The Cooper Union for the Advancement of Science and Art, one of the nation's most distinguished institutions of higher education. You can be deeply proud of having earned admission to Cooper Union through a process that is unequalled in rigor and selectivity among American colleges and universities. You can be even more proud of successfully completing one of the most demanding academic programs offered today. I extend to you my best wishes for continued success as you pursue your hopes and dreams.

During your years at Cooper Union, you have witnessed social, political and economic volatility of historic proportions in the larger society, locally, nationally and globally. Natural disasters reminded us of shared human frailties and of the common bonds of humanity across a diversity of cultures. The cumulative impact of humankind on our fragile environment has also defined a broad spectrum of problems that must be addressed by your generation. At the same time, you have participated in an unprecedented transformation of the college, as it reinvested in its infrastructure, replaced forty percent of the academic facilities, renewed much of the remaining classroom, laboratory and studio space and adapted curricula to meet the evolving intellectual and professional needs of students in the twenty-first century. Consequently, you have helped to affirm that critical institutions must constantly reinvent themselves as vital and vibrant by engaging the talent and will of the community.

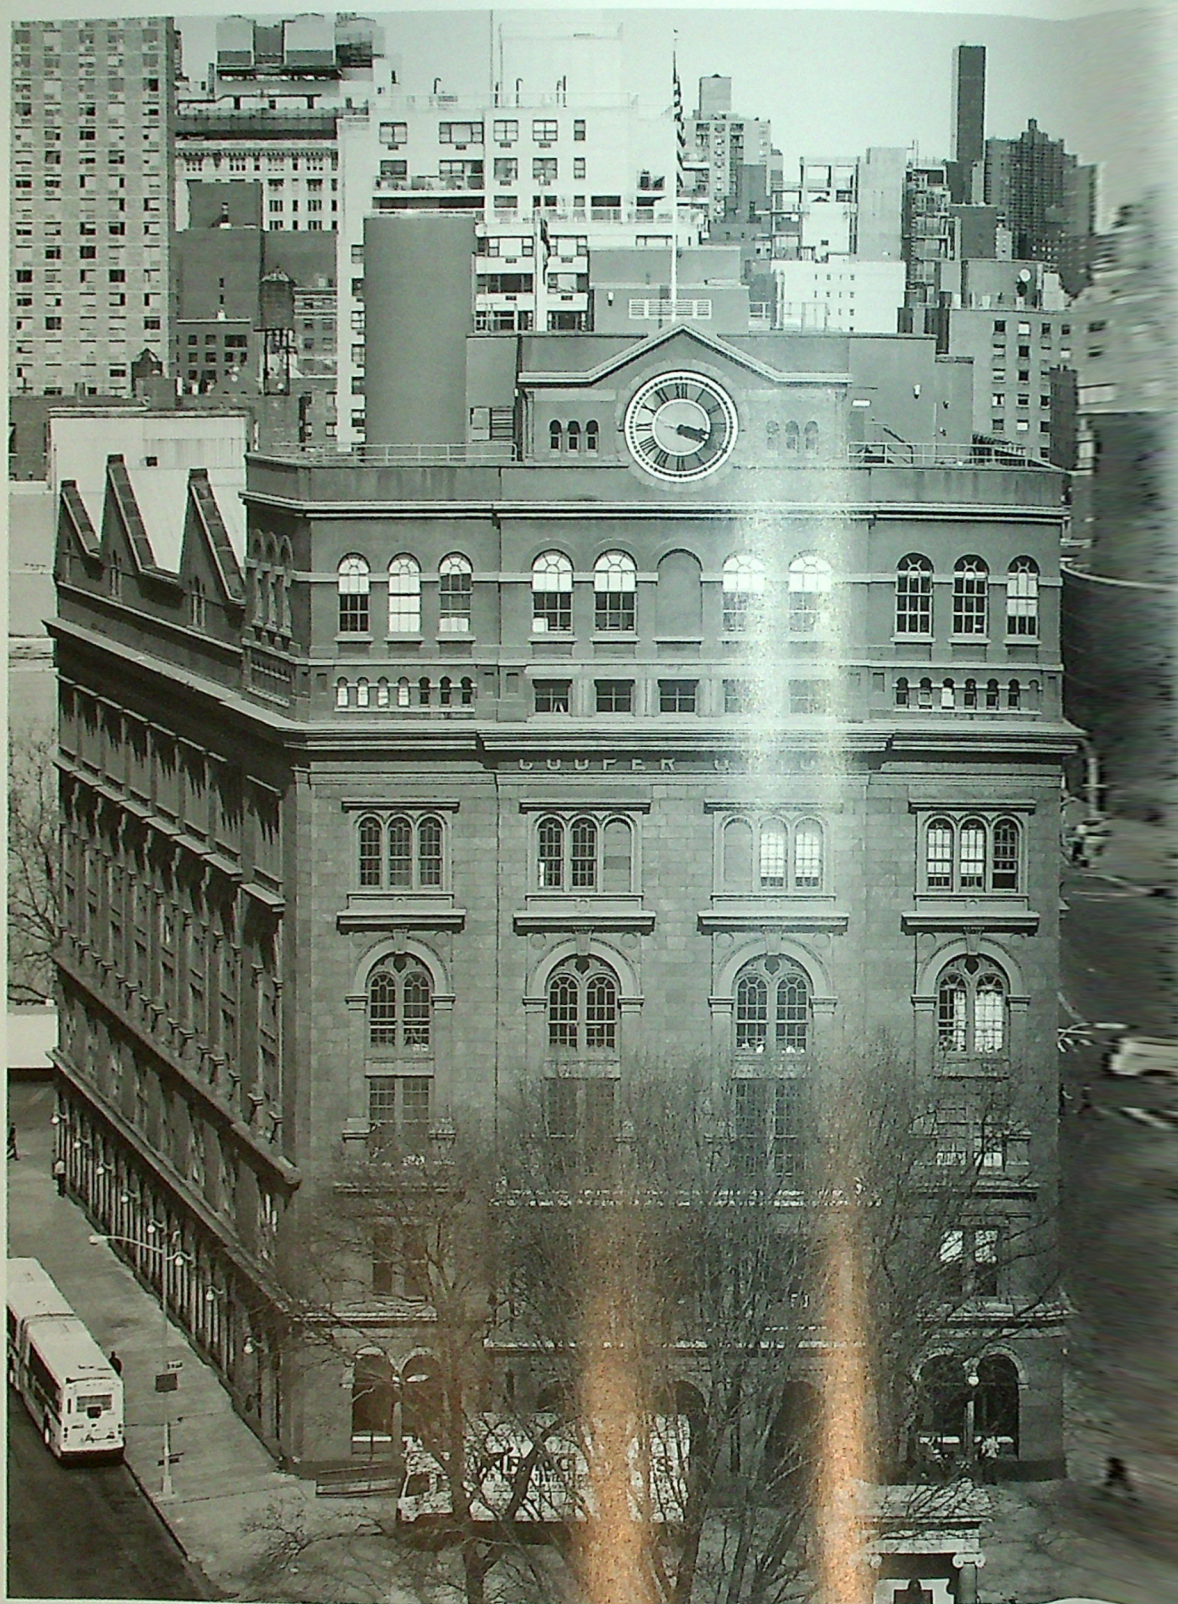

It has been our goal to ensure that you are well-prepared, that you have the creative energy, the discipline and intellectual capacity to meet the challenges you will encounter in your respective careers as engineers, scientists, architects and artists, and more generally as humanists and leaders in your professions. The gift of a Cooper Union education comes with the expectation that you will apply your formidable talents to make a measurable difference in the world, and that you will join with your fellow alumni in perpetuating the extraordinary legacy of Peter Cooper.

A handwritten signature in dark ink, appearing to read 'George Campbell Jr.', with a stylized, flowing script.

George Campbell Jr., Ph.D

President
